PROFESSIONAL SUMMARY

Results-driven Python Full Stack Developer with proven experience designing and deploying end-to-end web applications using Django, REST APIs, and modern frontend technologies. Skilled in building scalable MVC-based architectures, implementing secure user authentication systems, and developing responsive UI with HTML5, CSS3, and JavaScript. Adept at database management with Django ORM and SQL, version control with Git, and consuming third-party APIs. Ranked Top 7 in university; recognised among Top 10 Innovations at Tech Preksha.

KEY SKILLS

Languages & Frameworks: Python, Django, JavaScript (ES6+), HTML5, CSS3

Full Stack & Web: REST API Development, MVC Architecture, Django ORM, DOM Manipulation, Responsive Design, Flexbox, CSS Grid, Fetch API, Asynchronous JavaScript

Database & Backend: SQL, Database Design, CRUD Operations, Session Management, User Authentication

Tools & Practices: Git, GitHub, Version Control, OpenWeather API, Geolocation API, OOP, Data Structuring, Debugging

PROFESSIONAL EXPERIENCE

Data Annotator | Cogito Tech, Noida

March 2025 – Present

- Extracted, structured, and validated pharmaceutical datasets for the Deep Cognition project — applying backend-level data processing logic to ensure accuracy and integrity across large-scale pipelines.
- Collaborated cross-functionally on DUO2, PHI, and Deep Cognition projects, delivering consistent, high-quality structured data outputs under tight deadlines — mirroring agile sprint delivery cycles.
- Applied systematic debugging and analytical thinking to data validation workflows, building skills directly transferable to REST API development, backend logic, and full stack troubleshooting.

PROJECTS

FullStackBlogWebApplication | Python,Django,DjangoORM,HTML5,CSS3,JavaScript

[GitHub](#)

- Architected and deployed a full stack blog platform using Django MVC framework with complete CRUD functionality — create, read, update, and delete posts — backed by a structured SQL database via Django ORM.
- Engineered a secure user authentication system covering registration, login, logout, and session management with server-side validation and protected route access.
- Built a fully responsive, template-driven frontend using Django templating engine, HTML5, and CSS3 — ensuring consistent cross-device UX.

Real-TimeWeatherApplication | JavaScript,RESTAPI(OpenWeather),GeolocationAPI,HTML5,CSS3

[GitHub](#)

- Integrated OpenWeather REST API using asynchronous JavaScript (Fetch API) to consume and dynamically render live weather data — demonstrating full stack API integration and JSON data handling.
- Implemented Geolocation API for auto-detection, robust error handling for denied permissions and invalid inputs, and dynamic UI updates based on live API responses.

TaskManagementWebApp | JavaScript,HTML5,CSS3

- Developed a dynamic, fully responsive to-do application using vanilla JavaScript with DOM manipulation, event-driven interactions, and modular code structure following OOP principles.

ZomatoUIClone | HTML5,CSS3,ResponsiveDesign

- Replicated a production-grade responsive landing page using Flexbox, CSS Grid, and Media Queries — demonstrating strong frontend layout proficiency applicable to full stack UI development.

EDUCATION

Bachelor of Computer Applications (BCA) — Aravali College of Engineering and Management, Faridabad

Senior Secondary (XII), Science (CBSE) — Kautilya Government Sarvodaya Sr. Sec School, New Delhi

ACHIEVEMENTS

- Top 10 Innovations — Tech Preksha, Dron Acharya College
- Qualified 2nd Round — Tech Parambh, Aravali College
- University Rank: Top 7, First Semester of BCA
- Certificate of Participation — Basics of Python Programming
